

“The ability to learn is the most important quality a teacher can have “

We live in a world that is constantly undergoing change at an accelerated pace and as educators, it is time to pause and reflect on the system. The question I often ask myself, Are my teachers and students well equipped to handle the challenges of the future? What will give them an edge over others to keep pace with the ever changing educational scenario?

Teachers today find themselves caught between the fast changing technology and digital divide that stands as a barrier between them and their students. You all will agree that technology cannot replace teachers but a teacher who uses technology can replace one who does not. Hence it is imperative for teachers to equip themselves with ICT skills. Keeping this in mind, the school just concluded a 3 day ICT workshop, aptly called “Learning in the changing digital times “, an inter DPS ICT meet conducted under the aegis of DPS society HRD centre.

Day 1: -

<https://www.facebook.com/media/set/?set=a.519721938177356.1073741875.472592642890286&type=3>

The workshop had as many as 51 participant schools, congregated, with an aim to introspect on their need for ICT, its availability , effectiveness, best

practices and challenges. ICT is an effective pedagogical tool that not only enhances teacher efficiency but also makes classroom teaching more effective. The workshop was graced by stalwarts from the field of educational research, namely, Mr VK Shunglu, Chairman, DPS Society, Dr MM Pant , Ex – Pro Vice chancellor , IGNOU , Professor Raja Ram Sharma, Joint Director ,NCERT , Mrs Vinita Kher, Director CEM,HRD, DPS society and Mr Rahman Khan. The eminent guests enlightened the teachers about the vital role that technology is going to play in their lives as learning facilitators.

Day 2:

<https://www.facebook.com/media/set/?set=a.519786561504227.1073741876.472592642890286&type=3>

“Teaching Techniques and Teacher Motivation “, a workshop conducted by resource person Col. Sudheer Sinha, gave the teachers an insight on how a teacher can be self-motivated and as a consequence overcome all external barriers that may hinder her from being the best facilitator. The resource person also

conducted a teacher evaluation protocol, wherein students evaluated their teachers.

Day 3:-

<https://www.facebook.com/media/set/?set=a.519830128166537.1073741877.472592642890286&type=3>

INTEL conducted a workshop for our secondary and higher secondary students on “Building Technology and Computational Skills “. The workshop aimed at developing an interest in design, discovery and coding.

A workshop was also conducted for these students on “Stay Safe Online” by Professor Ponnuragan Kumaraguru. He highlighted issues related to cyber safety in a very interesting manner.

As the session marches ahead with rigorous academic programs, we also seek to develop the co-curricular faculties of our students.

The students participated in various events conducted by Horlicks and emerged overall winners for the 2nd consecutive year.

The CCA periods were action packed, a DSK design workshop was conducted for the students. “Healthy Breakfast”, a cookery competition was also a part of the CCA periods.

The school aims at providing a caring and nurturing community for every student to achieve their true potential. An environment where the child can push himself to the extreme with the help of his teachers and never feel the pressure. In addition to this I would urge each parent to be an active participant in all school programs and I believe that together we can make this a successful school year.

God Bless !!

Warm Regards

Manju Balsubramanyam
